

Product Datasheet

Product code: 818-01

Product type: Loupes and Magnifiers

Made in: Germany

Description: 818-01 is a loupe with magnification of 8x. The Ø24mm lens smallest graduation point is 0.1

millimeters. Loupes and magnifiers are designed for a variety of applications including

machining, inspection, measurements, and so on. Loupes are used predominantly in jewellery trade, watchmaking, electronics and education. Jewelers typically use a monocular, handheld

loupe in order to magnify gemstones and other jewellery. Loupes are also used by

watchmakers in the assembling of mechanical watches. In electronics, loupes can be helpful to inspect circuit boards for manufacturing defects or observing SMD components. A loupe is

essential for identifying and positioning small parts.
