Beauty

Black is modest and arrogant at the same time. Black is lazy and easy — but mysterious. But above all black says this: I don't bother you — don't bother me.

Yohji Yamamoto

Women think of all colors except the absence of color. I have said that black has it all. White too. Their beauty is absolute. It is the perfect harmony.

Coco Chanel

Black is not sad. Bright colors are what depresses me. They're so... empty. Black is poetic. How do you imagine a poet? In a bright yellow jacket? Probably not.

Red is one of the strongest colors, it's blood, it has a power with the eye. That's why traffic lights are red I guess, and stop signs as well... In fact I use red in all of my paintings.

Keith Haring

For many, red is the color of love. For others, it's warmth. For some, it's aggression. It's passionate and demands attention. And science even now suggests that red is an important part of both male and female attraction. For all the things that red is, it seems, one thing it is not is neutral.

Almost without exception, blue refers to the domain of abstraction and immateriality.

Wassily Kandinsky

Blue has no dimensions, it is beyond dimensions, whereas the other colours are not... All colours arouse specific associative ideas, psychologically material or tangible, while blue suggests at most the sea and sky, and they, after all, are in actual, visible nature what is most abstract.

There are three things extremely hard: steel, a diamond, and to know one's self.

Benjamin Franklin

Gray is the color of intellect, knowledge, and wisdom. It is perceived as long-lasting, classic, and often as sleek or refined. It is a color that is dignified, conservative, and carries authority.

Gold is the color of a rug. Gold is the color of loving hug; Gold is the color of a bursting flame. Gold is more than anyone can name. Gold is the color of many riches. It's the start to wonderful wishes. Gold is the note to a single song. Gold is the happiness of those who sing along. Gold is sound, that of a dove, Gold is the color that sends out love.

Yellow is my favorite, but what is yellow? Handmaiden to white, it is a slight tarnish of pure light. Take away a bit of whites absolute luminosity, and what remains is yellow -- sunlike, golden as a crown, buttercups in a field, marsh marigolds, a finch's wing, a plastic flute.
